### Tenting Guidelines

- All of our tents are *frame* tents, not pole tents or canopies
- The tent top fabric is weather resistant and ideal to use in almost all weather conditions
- Our tents can be erected on grass or over hard surfaces
- When we erect the tent on grass, the tent will be staked into the ground
- We will need approximately 3 additional feet in all directions for ropes and stakes
- When choosing a site for us to erect the tent, be sure it is clear of under-ground pipes and wires, as well as overhead obstructions
- When we erect the tent on a hard surface, we will use cement block at each leg to secure the tent
